Micross Components signs agreement with Avnet Electronics Marketing to Distribute Entire Line of QML-Certified Memory Products

Austin, Texas- Micross Components, global provider of specialized products & services and distributed components for the electronics community, has signed a distribution agreement with Avnet Electronics Marketing. The agreement will enable both companies to bring Micross Components entire line of QML-certified (qualified manufacturers list) and ISO 9001/AS9100 registered semiconductor products to the military, aerospace, transportation, industrial, embedded and medical markets. The agreement encompasses all of North America.

Avnet Electronics Marketing is one of the world's largest technology marketing, distribution and services companies. In addition to offering a broad array of electronic components from leading manufacturers, Avnet also provides engineering design-chain services combined with world-class supply-chain services to its customers globally. Truly focused on exceeding your needs and expectations, Avnet is a company dedicated to giving you Support Across the Board.

"Micross Components is excited to bring our 22 years of experience in the military and aerospace marketplace to Avnet's line card," said Larry Wallace, general manager of Micross Components' semiconductor operations. "We look forward to providing our competitive offerings and personalized service to the multitude of customers who depend on Avnet's best in class distribution."

"The addition of Micross Components allows Avnet customers unprecedented access to a significant array of memory products that are Defense Supply Center Columbus (DSCC) registered, SMD (Standard Military Drawing) compliant and QML-certified," said David Moore, director of defense/aerospace business development for Avnet Electronics Marketing Americas. "Not only will our customers be better served by their products, but Micross' custom packaging will augment our existing semiconductor aftermarket capabilities and allow us to provide our customers long-term production for a wider range of end-of-life or obsolete components."

About Micross Components

Micross Components is a global provider of specialized products & services and distributed components for the electronics community. Their specialty is in solutions for hi-reliability and state-of-the-art electronic applications which span across commercial, industrial and hi-reliability markets. They represent a single source for specialty electronics able to provide leadership in the design, manufacture, logistics and distribution processes necessary to realize and support an application from start to finish.
