DLA LAND AND MARITIME VQ (VQH-10-020894)

August 13, 2010

SUBJECT: Class H MIL-PRF-38534 Certification, Hybrid Microcircuits, FSC 5962

Mr. Glen Frashure
Vice President, Quality
Micros Components
8701 Cross Park Drive
Austin, TX 78754-4566

Dear Mr. Frashure:

Your hybrid facility at the above address was sample audited the week of April 8-10, 2008 for compliance with MIL-PRF-38534 Class H. An acceptable level of confidence has been established that compliance with these requirements exists. Therefore, Micros Component's Class H certification (certificate enclosed) is continued.

This certification is for the following:

Quality Management Plan: Quality Management Program Plan, ASP 2, Revision L,
Quality Manual ASP 1 Rev. R.

Conversion of Customer Requirements: Conversion of Customer Requirements,
ASP 3500, Revision J.

Controlled documentation baseline for processing MIL-PRF-38534 devices:
Document Baseline Listing, ASP 2, Appendix 1, Revision L.

This certification is valid until terminated by written notification from the qualifying activity. The normal period of certification is two years from the date of the audit and, if warranted, may be withdrawn at any time. Your facility may be re-audited on a drop-in basis at any time.

All qualification, conformance, and periodic inspection must be performed at a facility, which has a DLA Land and Maritime VQ letter of Laboratory Suitability for the applicable test method and condition, unless otherwise approved by your Technical Review Board (TRB).

QML manufacturers shall notify the qualifying activity immediately after learning of a potential issuance of a GIDEP alert, problem advisory or major quality/reliability problem affecting QML products. This includes failure to perform screening or sample testing (including inspection) in accordance with MIL-PRF-38534. Failure to provide notification may be grounds for removal from QML-38534.

Note: This is an update to letter DSCC-VQ (VQH-10-19460) and reflects the change of company name from Austin Semiconductor to Micross Components.

If you have any questions, please contact Mr. Buben at (614) 692-0592.

Sincerely,

JOSEPH GEMPERLINE
Chief
Sourcing and Qualifications Division
